JANUARY

SAN DIEGO CHAPTER MONTHLY NEWSLETTER

2012

President's Message

Happy New Year to you all. Hope you had an enjoyable Holiday Season.

The new Board, Joe, Mat, Pat and I, would like to thank you for all of your support and assistance as we begin our two year term of service. It is our goal to uphold the tradition of excellence that our chapter has displayed and hopefully take it to the next level.

I encourage you to take pride in our chapter and participate in the many benefits it can provide. Our excellent insurance value and unprecedented sick leave plan are just the beginning of what IPSSA can offer. The ability to interact with some of the best pool professionals in the business is invaluable. The networking opportunity with our Chapter Supporters not only allows you to refer specialty services to your clients but can put some extra cash in your pocket.

By participating in our committee projects such as the water safety program and the blood drive, you can give back to the community and feel good doing it.

We will continue to offer you numerous educational opportunities, not only to make fulfilling your point requirement easy, but to help you stay on the cutting edge of industry technology and

maximize your income potential.

Do not miss the Region 7 Table Top on Jan.28. You can pick up some points, attend some great seminars and meet with the Product Manufacturers. Hope to see you all there.

In closing, please let me remind you that this is your Chapter. Your voice matters in what we do. The Board is here to serve you. While we vow to keep our meetings as brief as possible, your participation and input are not only welcome but essential as we go forward.

Succeeding the outgoing Board will be a tough act to follow. We are all indebted to Mark, Phil, James and Jim for their fantastic four year run of service to our chapter. With their input, we will make the transition as seamless as possible and we look forward to the next two years leading the best chapter in all of IPSSA , SAN DIEGO !

All the best to you and your families in 2012 ,

Mike Anderson

Jeff Waters Obituary

We are all saddened to hear of the untimely death of Jeff (JJ) Waters last December 28. Jeff was born August 29, 1950 and was a native San Diegian and graduated from Grossmont High School.

Jeff leaves behind his sister Judi several nieces and nephews many friends as well as all of us at IPSSA. JJ loved the Zoo, a good day in the sun, Mexico, fishing, games of all kinds, Hawaiian shirts, COLD BEER, red wine, a rare steak, a good party and foremost good looking women! JJ was always ready to help whenever needed.

We will miss him. The world will be a bit less fun without Jeffery John Waters. Rest in peace, see you soon!!

Blue Cards Due on or before Feb. 15 General Meeting

Please send or give your completed, legible Blue Cards to Paul Grimes. Your options are:

- Mail via US Postal Service to San Diego Chapter IPSSA PO Box 600862 SD CA 92160-0862.

Must be postmarked on or before Feb. 15, 2012

- Bring to Jan or Feb meetings and hand to Paul Grimes.

Failure to submit a Blue Card as listed above will result in a \$50 fine. A \$50 fine can be assessed for an incomplete card or if the card is illegible.

Board Meeting – 1/4/2012

Mike Anderson, Joe Dianna, Pat Nieratko, Matt Sweeney, Mark Curran, Jon McArthur

Call to order 7:15pm

Mike Anderson brings to attention two very important issues:

First Issue - the passing of IPSSA member Jeff Waters.

Second issue - Continuing Education.

Officer Reports

Joe Dianna discussed Chapter Supporters that have not paid and discussed contacting them for payment.

We discuss process of screening Chapter Supporters and introducing

possible supporters to IPSSA at the January 28th table top.

7:25 Mike Nominates John Silcox as the New Member Committee Chairmen.

Mike discussed our positions for the new year.

The Skimmer will continue to be sent out by email.

7:41 Mike Anderson makes a motion to change the blue ticket from skimmer to a raffle ticket, Board agreed.

Treasury Report.

Pat Nieratko states we are doing very well financially.

7:51 Mark Curran makes motion to have Peter Gozdeck of three step billing do an independent audit of previous two year financials.

7:57 Board agrees on motion and elects Peter Gozdeck of three step billing for an independent audit of previous two years.

Mike Anderson asked Jon McArthur for a Continuing Education update - nobody has been expelled.

Easy Extra Cash & Keep Your Customers Happy - **Why Not?**
Recommend a Suntrek Solar Pool Heating System Today!

- 19 years in manufacturing and installing our patented solar pool heater systems
- Over 20,000 satisfied customers
- Suntrek collectors rated among highest ever tested (1024 BTU/Sq ft)
- Flexible custom made collectors can be installed anywhere that gets direct sun
- 15 year limited warranty unsurpassed in solar industry
- Made in the USA
- Extends your customer's swim season increasing the value of their pool

Generate additional income by recommending Suntrek solar hot water and solar electricity systems

With Suntrek you can be confident your customers will be satisfied!

CALL TODAY! 760-317-6722

Lori Bloom, Suntrek San Diego Manager and
IPSSA San Diego Chapter Supporter

Earn \$300 - \$1,100 per customer sale!

Get bill stuffers and sales materials so you can start earning your referral fees today!

Board Discussed removing members who dropped out and contacting IPSSA INC. to remove names from roster.

Jon McArthur is planning on updating or simplifying current education program rules.

8:30 Mike Anderson nominates Mike Greg to be an honorary member of IPSSA and Mark Curran seconded the motion.

Board nominates Mike Greg to be voted in at the March general meeting pending general membership attendance.

Board discussed possible volunteers for the table top on January 28th.

Pentair and Hayward are putting on a one hour live demo at the table top.

8:50 IPSSA member Jeff Waters passed away on December 28th.

Board reviews his pool route and how coverage will proceed until the route can be sold.

9:33 Mike Anderson and Jon McArthur nominate Jeff Marshall as the New Entertainment Chairmen.

9:45pm Meeting Adjourned.

Clear Water Pool Covers

Automatic Cover Problems?

We do: ♦ Service on all brands of automatic pool covers
♦ Replacement fabrics for all existing systems
♦ System installations on new or existing pools

We do NOT:

- ♦ Sell any pool products other than automatic covers
- ♦ Clean Pools
- ♦ Sell or service any other pool equipment

Automatic Pool Covers are our only business !!

Subject: Is the Saturation Index always Reliable?

When calculating the Saturation Index (SI), does a single low water parameter such as calcium hardness (CH), or a low carbonate alkalinity (C-ALK), make the water automatically aggressive to pool plaster, even when other water parameters are high enough to balance the SI?

To answer that question, an experiment was conducted. Two quality pool plaster coupons were made and cured in balanced water for 90 days. At that point, plaster coupon #1 was placed into SI balanced water, but with a low CH of 90 ppm. The C-ALK was maintained at 110 ppm and the pH from 7.9 to 8.2, which offsets the low CH and achieves a balanced SI of -0.1 to +0.2.

Coupon #2 was also placed into SI balanced water that had only 45 ppm of C-ALK. The CH of this water was 360 ppm and the pH was maintained between 7.7 and 8.0, off-setting the low C-ALK and achieving a balanced SI of -0.1 to +0.2.

After six months in the water, the coupons were removed, and the water they were in was tested for the calcium content to determine if any dissolution or etching of plaster surface material occurred. Of course, any increase in calcium from the submersion water's starting point would indicate that calcium had been dissolved from the coupon, which was the only available source of additional calcium.

The result? There was no increase of calcium in either water container.

Therefore, these results indicate that if the calcium hardness or the carbonate alkalinity is low, but the water is still determined to be SI balanced, the water is not aggressive. This indicates that the SI is applicable for plaster swimming pools.

This experiment was conducted because some in the pool industry claim that pool water with a low CH or a low C-ALK is automatically aggressive despite what the SI actually is. Often, when a new pool plaster surface has undergone severe gray mottling, white spotting, streaking discolorations, flaking, nodules, or other defects actually attributable to plastering errors, the finger is pointed at aggressive water chemistry instead. Specifically, a CH or C-ALK below the APSP "Ideal" minimum is blamed, even in cases where the actual LSI is balanced.

It is interesting to note that the current National Plasterers Council (NPC) 7th Edition Technical Manual states that if any isolated, individual water parameter (pH, C-ALK, or CH) is lower than the "Ideal" range as defined by the APSP, the water is aggressive. Therefore, the NPC is (incorrectly) stating that when the C-ALK is less than 80 ppm (while the total alkalinity may be above 80 ppm), or when the CH is less than 200 ppm, or when the pH is below 7.4, (which are the lower ends of the APSP's "Ideal Standard"), the water is automatically aggressive and considered to be detrimental to the plaster finish (even though the SI may be balanced).

This is a complete departure from the NPC text on this topic in their 5th Edition of the Tech Manual. It stated that pool water needed to be within the "acceptable tolerance" range as established by the APSP, which set the "minimum" for C-ALK at 60 ppm, CH at 150 ppm, and a pH of 7.2. It is apparent that the water balance requirement by the NPC is more restrictive now. Why did the NPC make that change? Where is the study documenting that a low CH or C-ALK is automatically aggressive when the LSI is 0.0 or higher? Has the National Pool Industry Research Center at Cal Poly (NPIRC) proved that? No.

Now, we are not necessarily promoting the concept that pool water should be maintained on a regular basis with the pH, C-ALK or CH below the minimum APSP targets. We are not even suggesting that the ranges below the ideal are always the optimum. We would recommend that pH and C-ALK levels be maintained above the ideals, not below, whenever possible. However, we understand two things: that there are times when lower pH, CH or C-ALK are unavoidable, and that chemistry is chemistry – the SI "balance" means exactly that... it is not a tool for blaming plaster defects on water chemistry.

As the above plaster study demonstrated, pool water with a single low water parameter (even below the APSP's "Ideal" or "Minimum" standard) can be non-aggressive if the SI is balanced.

onBalance

January 11, 2012

**FIGHT AGAINST
UNDERGROUND ECONOMY
CONTINUES
SPEC Supporting New
Legislation and Efforts**

“As we begin the New Year, it is encouraging to see that the fight against the underground economy is gaining momentum in the Legislature and various state agencies,” stated John A. Norwood, President of SPEC.

On January 1st of this year, the Department of Industrial Relations (DIR) announced the launch of the newly created Labor Enforcement Task Force (LETF). LETF is a collaborative effort between state agencies to combat the underground economy and to improve California’s business environment where legitimate employers can thrive.

The primary partners of the LETF include DIR, the Employment Development Department, Contractors State License Board, Board of Equalization, and the Bureau of Automotive Repair. LETF will also collaborate with the Department of Insurance, the Attorney General and Local District Attorneys, and others in affected communities. LETF will help ensure that workers’ rights are protected and that hard-working, compliant business owners have an opportunity for healthy competition in California.

LETF’s focus on collaboration, wider information-sharing and use of new technology for enforcement will ensure more effective targeting of businesses in the underground economy. This will help eliminate the worst violations of workers’ rights and help to protect the legitimate contractors and businesses. The task force will also conduct outreach and education efforts to help businesses meet their responsibilities under the law.

The goals of the workforce will be to:

- Ensure workers receive proper payment of wages and are provided a safe work environment.
- Ensure California receives all employment taxes, fees, and penalties due from employers.
- Eliminate unfair business competition by leveling the playing field.
- Make efficient use of the state and federal resources in carrying out the mission of the Labor Enforcement Task Force.

In addition to the new task force, two SPEC-supported bills from the 2011 legislative session went into effect on January 1st. AB 397 (Chapter 546, Statutes of 2011) requires a licensed contractor with an exemption for workers compensation insurance to recertify the exemption upon license renewal or provide proof of workers' compensation insurance coverage. AB 878 (Chapter 686, Statutes of 2011) requires a workers' compensation insurer to report to the Contractors' State License Board (CSLB) a licensed contractor whose insurance policy it cancels.

As the 2012 Legislative Session begins, we will be seeing a number of new legislative proposals by way of introduction or what is known as a “gut and amend.” A “gut and amend” is when an author takes a bill on one subject, completely deletes that version and inserts a new proposal on a new subject. The deadline for new bill introductions is February 24th but “gut and amends” can happen all year. They are most prevalent, however, at the beginning of a two-year session or the end of any session.

We are only in the first two weeks of the session and already two “gut and amend” measures were amended to be proposals relative

to the underground economy. Both bills are authored by Senate Labor & Industrial Relations Committee Chairman Ted Lieu (D-Torrance).

SB 691 would assist the CSLB in preventing workers' compensation fraud by adding CSLB to the list of authorized governmental entities that EDD may share information with for the purposes of aiding any specific workers' compensation fraud investigation. This bill is supported by the CSLB. SB 777 would specifically authorize the EDD to share employment data and information with the CSLB for purposes of investigating specific workers' compensation fraud investigations. This authorization will allow the CSLB to compare data on wages on employment taxes with information the bond has relative to workers' compensation.

SB 777 would provide that, for the purposes of workers' compensation insurance fraud investigations, the reasonableness of any request information to investigate fraud must be determined by the Director of the Department of Industrial Relations in consultation with the state department, agency, or organization in possession of the information or data. One of SPEC's arguments is that state agencies should be using more technology, more than boots on the ground, to identify and prosecute non-compliant contractors. SB 777 will serve as a vehicle for discussion to encourage and codify ongoing and new requirements and practices to encourage data sharing and collaboration among governmental agencies.

Both bills were heard and passed by the Senate Labor & Industrial Relations Committee this past Wednesday. The two measures will now go to the Senate Appropriations Committee for hearing before heading to the Senate Floor.

Beautiful on the Inside- A Negative Edge Repair – Poolscape Unlimited, Inc.

This gorgeous pool with the view to match had its problems. Ugly on the outside! Like many negative edge pools with the spill over wall going thru the constant temperature changes, wet and dry cycle's the tiles were falling off. The original glass tile was probably not the best choice for the back side of this pool.

Poolscape Unlimited was employed to come up with the solution. We chose a 12x12 ceramic travertine look a like tile to match the surrounding deck materials. The larger tile provide for more surface area adhesion as opposed to the original small glass pieces. Also by choosing a lighter colored tile we can help reduce heat absorption which helps reduce the expansion contraction factors.

The results were great. The new travertine tile not only provided a solution to the negative edge tile problem but gave the backside of the pool a great look that complements the rest of the pools beauty.

At Poolscape Unlimited we have a solution to all of your pool problems. Whether it is a full pool remodel or a small touch-up or repair we have you covered.
