

The Skimmer

DECEMBER SAN DIEGO CHAPTER MONTHLY NEWSLETTER 2013

President's Message

Happy Holliday's to you and your Family. I hope you had an opportunity to celebrate with loved ones and friends. On behalf of the board, I would like to thank everyone in the Chapter for your support during our two years of service. We are proud of the job we have done and enjoyed giving back to the best chapter in all of IPSSA! We officially passed the torch to

Meeting. We are confident that they will keep the ship steered in the right direction.

I hope you did not miss the Holiday Party at the Town and Country. It was an awesome event and everyone had a great time. Thanks to the Entertainment Committee, Jeff Marshall and Bob Miller, for all their work. The room was festive, the food was delicious and the music rocked. Gil Koury and his band, The I 90's, jammed all night and welcomed guest sit in's by members, Ron Magnant, and Adrian

Donnelly. We also presented Corey McClellan from the San Diego Junior Lifeguard Foundation with our community contribution check for \$4500. He was extremely grateful for our donation to his important water safety organization.

Well, this is my final Presidents Message or "Prez Mess" as I refer to it. Thank you for taking the time to read it and all the best in 2014. Happy New Year!

Mike Anderson.

Jon Silcox – New Member Committee

There are currently 2 prospective members in the New Member pipeline:

Tyler Didier, Southwest Pool & Spa Service - Tyler has attended the October and November meetings and Tyler's sponsor is John Baldwin. Andre DePaula, AH Pools - Andre attended the November meeting and Bernie Mirelez is Andre's sponsor.

2013 B.K. TAYLOR AWARD WINNER!
Michael Anderson

2013 DAVID COUREY AWARD WINNER!
Brandon Chase of SunChaser Inc.

The 2013 Charitable Contribution is the **San Diego Jr. Lifeguard Foundation**. \$1,300 cash was raised at the October Mandatory Meeting. IPSSA Inc. donated \$600 to our Charitable Contribution. The Chapter and the Table Top matched our donation bringing the total to \$4,500.

Christmas Party – 12/06/2013

Meeting began at 8:34pm
Mike talked about the 2013 Charitable Contribution. At the October Mandatory Meeting we raised \$1,300. Our Chapter matched the \$1,300 and the Table Top matched \$1,300. IPSSA Inc. contributed \$600 bringing the total to \$4,500. Paul Grimes presented a check of \$4,500 to Corey McClelland of the San Diego Junior Life Guard Foundation. Corey stated that it takes about \$100 to teach a child how to swim. The money donated will save many kids from drowning. Corey thanked our chapter! President Mike Anderson presented the out-going board with a few gifts and thanked each board member for their support and hard work. Vice President Joe Dianna talked about Brandon Chase's positive characteristics and dedication to the Chapter. Joe presented a plaque to Brandon Chase for being the 2013 David Courey Award winner. Brandon Chase talks about David's dedication to the chapter and is honored to receive this award. Mark Curran talked about B.K Taylor being a long term member of the chapter. He always volunteered and went above and beyond for the chapter. Mark Curran presented the 2013 B.K

Taylor Award to Mike Anderson. Mike introduced the new Board of 2014. The President - Austin Gardner, Vice President - Mike Harris, Treasurer-Thomas Graham and Secretary - George Lugwig. Meeting Adjourned 8:56pm

Board Meeting–12/18/2013

Call to order at 7:05pm
Attendance: Mike Anderson, Joe Dianna, Pat Nieratko, Matt Sweeney and Mark Curran
Guest: Austin Gardner, Mike Harris, George Lugwig and Thomas Graham.
Treasurer Report –Pat reported that we have four members with outstanding fines. Mark reminded the board that those four members have now lost the right to appeal the fines. Mike explained the steps of sending out fines and we must follow protocol. Pat talked about having a combined total of \$43,000 after the expense of the Christmas party.
Secretary Report – Matt talked about the transfer of the PO BOX to the new secretary. Matt reminded the new board of the skimmer deadline being the 2nd Wednesday of the month.

Son Energy is Solar Pool Heating Perfected with Free Clean Energy from the Sun!

Professional, certified and quality workmanship! Over 30 Years' Experience!

- ✓ Patented and leading panel design approved by SRCC, ISO and SEAL
- ✓ Full flow design eases burden on filtration equipment
- ✓ Roof friendly applications
- ✓ World's leading panel manufacturer
- ✓ Ultimate Peace of Mind Lifetime Warranty
- ✓ Guarantee your clients the best with a maintenance free solar system by Son Energy

Earn extra money when you refer a client for a Hot Water or Photovoltaic system!

Call 760-738-4066 and ask for Kristal! Visit us at our new website www.sonenergy.com!

Mike talked about all the positive feedback he got from members who attended the Christmas Party. Bob and Jeff are stepping down from the Entertainment Committee and are looking for their replacement's.

Vice President Report - Joe talked about Chapter Supporters who haven't paid their dues for the year. The Directory deadline has come and past. Joe is still looking for a guest speaker for the January 15th General Meeting. Mike talked about Continuing Education Points and the first Agenda of the new board will be to remove any members who have not earned 10pts. Mike reported on one claim against our chapter as of recent.

Manufacture Rebate – Mike announced that we are \$7,000 over our projected amount of \$120,763.93 so we will receive a check from PEP this year. Mike talked about the upcoming Leadership Conference January 31-February 1st. The president and Treasurer are required to go to avoid a fine.

Mike and Austin talked about the President and Treasurer being required to attend the Leadership Meeting and should be compensated for their time and expenses.

Subject: Pool Industry Duped - Pool Owners Scammed #5

One of the most absurd conclusions by the NPC/NPIRC study has to do with the causes of craze cracking (shrinkage cracks) in pool plaster.

It has been known for decades in the cement/concrete industry that high water to cement ratios, calcium chloride additions, excessive wet troweling, and hot and windy weather leads to increased shrinkage cracks and other problems (ACI 302.1R-04).

Yet, the NPC and two Cal Poly professors disregarded that established science and tried to connect certain sanitizers as causing increased craze cracking! The Phase 2 study report states that Salt systems resulted in the greatest amount of craze cracking (and also etching and discoloration); with Bleach, Trichlor, and Cal Hypo somewhere in the middle, and Dichlor with having the least amount of craze cracking (pg. 43 & 85).

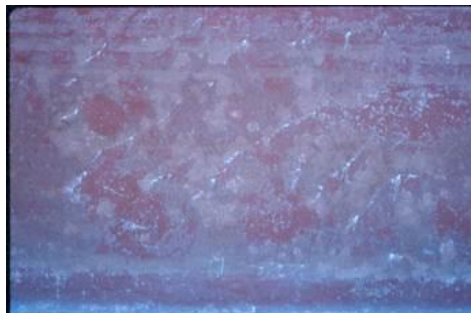

How in the world could the chemistry professor think that different sanitizers affect plaster differently? He would know that all chlorine sanitizers add the same thing (chlorine) to the water. And since the pH was maintained within the same range in all 12 test pools, how could there be any different affect?

And how could the concrete engineer professor go along with that conclusion knowing that shrinkage cracks involve materials, workmanship, and weather? Where in the ACI literature does it say that aggressive rain water causes shrinkage and craze cracking? It doesn't. In fact submerging plaster in water helps to reduce cracking.

The Phase 3 study report states that the Dichlor sanitized pools had the most crazing cracks (pg. 57). That is opposite of what occurred in Phase 2! Wouldn't that inconsistency raise a red flag? What is their excuse for suggesting that sanitizers increase crazing, and not mentioning a word about workmanship issues as likely causes? And the NPC claims that their study is credible.

Check out the link to what an NPC Technical Advisor wrote on a pool with cracking and calcium nodules.

The dark colored pool plaster above is an older pool that has delamination cracks and calcium nodules growing on them.

To: onBalance
Subject: Why White Pool Plaster Can Turn Blotchy

Both white pool plaster coupons below have been in water for one year. Sometimes the water was

slightly aggressive (negative LSI), and sometimes the water was slightly scale forming (positive LSI).

The top coupon was formed with only one percent calcium chloride (CC) added to the mix, and was properly troweled. It remained a "uniform white" the entire time.

The bottom coupon had 3% calcium chloride (CC) added, was late hard troweled, and also received some wet (water) troweling late in the process.

creating a "blotchy" appearance. The darker areas are very dense due to the hard troweling. The lighter (white) areas and spots are due to higher water-to-cement ratio and porosity from wet troweling. Had that coupon not been troweled with water, it probably would have been more overall gray due to the high CC and late hard troweling only. Sometimes, plasterers add 3% CC to a plaster mix to hurry up the hardening process and finish the pool faster. The plaster mix may harden so fast that the finishers can't keep up. If the plaster is not smooth enough, the finishers may then splash water onto the surface to rework and soften up the plaster again in order to get it smooth. This experiment demonstrates that improper troweling and workmanship can create non-uniform discolorations of pool plaster.

From: Kim Skinner
[mailto:kimskinner@rfburst.com]
Sent: Monday, December 09,
2013 3:48 PM
To: onBalance
Subject: How White Pool
Plaster Can Turn Gray

One would think that when mixing white cement with white limestone aggregate, the final pool plaster product would always be white. But that is not always the case.

Unfortunately, white pool plaster sometimes turns gray (or grey) either immediately or a few months after the pool is filled with water. So what causes that to happen?

The concrete/cement industry has documented that late hard troweling can cause a cement surface to darken, mottle, and spot. Also, adding a high dosage of calcium chloride (CC) to a plaster mix causes a slight darkened (graying) hue to develop. The combination of the two issues is really problematic.

The pictures below of plaster coupons demonstrate how white pool plaster can darken and mottle.

Picture above: Top left coupon: no CC added, properly troweled. Top right coupon: no CC added, late hard troweled. Bottom left coupon: 2% CC added, properly troweled. Bottom right coupon: 2% CC added, late hard troweled. All were placed in balanced water for one year. Note the darker color of bottom left coupon that had 2% CC added in comparison to top left coupon which had no CC added. Note the darker color of bottom right coupon that had 2% CC added and received only

minimal late hard troweling in comparison to the top right coupon, which had no CC added, and received four times the amount of late hard troweling.

Picture above: Note that the top coupon is the whitest. That coupon had zero CC added and was properly troweled. The middle coupon had 2% CC added, received some late hard troweling. The bottom coupon had 2% CC added, received some late hard troweling, and placed in balanced water for one year. Note how the bottom coupon darkened even more after being submerged in water. Pool owners pay good money for uniform white plaster, not gray or blotchy plaster.

I, the undersigned, waive any and all claims against IPSSA, Inc, IPSSA Management Company, IPSSA Chapters and/or its individual members, arising out of my participation in the IPSSA Sick Leave Program, including, but not limited to claims for lost income resulting from improper maintenance performed by IPSSA members. I have read and understand the standing rules for the Sick Leave Program and agree to participate in that program.
